DETAILED ACTION

Allowable Subject Matter

1. Claims 1,2,4-17 are allowable over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

As per the independent claims, the claim limitations pertaining to the freshness function, as defined in the specification (page 26 line 19 – page 27 line 15 of applicant's specification), is not explicitly taught by the prior art of record. Furthermore, it would not have been obvious to one of ordinary skill in the art of recognition to modify the teachings of the prior art of record to obtain the recited limitations of the independent claims as noted above. With respect to the prior art of record, Takahashi et al (5793891) teaches a model adaptive apparatus for performing an adaptation of a model used in pattern recognition which classifies input data in a time series into one of a predetermined number of models (Col. 9 lines 4-30, col. 11 lines 62-65); and training and updating models based on vector time series (col. 12 lines 20-31). Furthermore, Takahashi also teaches feature extraction (col. 12 lines 20-35). However, Takahashi does not explicitly teach the freshness function as claimed in the independent claims, as noted above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
